SUMMARY

Full-stack developer with 3+ production applications deployed to Vercel, specialising in Next.js, TypeScript, and modern React ecosystems. Experienced building SaaS platforms with authentication, payment integration, and real-time databases. Currently completing a Master of Information Technology Management at Deakin University. Strong eye for UI/UX design with a background in graphic design.

EXPERIENCE

Software Developer Intern | Softmint Software Solutions

Jul 2021 – Sep 2021

- Developed a sports venue booking web application allowing users to discover and reserve indoor playgrounds, gaining hands-on exposure to the full development lifecycle
- Gained practical experience with frontend technologies including HTML, SCSS, Bootstrap, and JavaScript, applying responsive design principles across desktop and mobile
- Collaborated with senior developers, learning industry workflows around code review, version control with Git, and delivering features against client requirements

Stack: HTML, SCSS, Bootstrap, JavaScript, Git

EDUCATION

Master of Information Technology Management

Nov 2024 – Present

Deakin University

Bachelor of Computing

Nov 2021 – Mar 2024

Coventry University

- First Class Honours

Higher National Diploma in Software Engineering

Apr 2020 – Aug 2021

NIBM

- GPA: 3.98

Diploma in Software Engineering

Mar 2019 – Apr 2021

NIBM

- GPA: 3.46

PROJECTS

Sadeepa Portfolio — Personal Portfolio Website sadeepa.me

Feb 2026 – May 2026

- Built a fully custom Next.js 14 portfolio with TypeScript and Tailwind CSS, achieving a Lighthouse performance score of 95+ on desktop
- Integrated Supabase as a headless CMS — all project, testimonial, service, and about content fetched live with no traditional backend
- Implemented GSAP-powered scroll animations, Lenis smooth scrolling, a custom magnetic cursor, and scramble text effects for a premium editorial experience
- Built interactive 3D elements using Three.js, including floating letters that respond to mouse movement and a drag-to-rotate global dot-map
- Fully responsive across all devices with a custom dark design system

Stack: Next.js 14, TypeScript, Tailwind CSS, Supabase, GSAP, Framer Motion, Vercel

SpendWix — Full-Stack Budget Tracker SaaS spendwix.vercel.app

Oct 2025 – Jan 2026

- Built a production-ready personal finance SaaS from scratch, enabling users to track income, bills, expenses, savings, and debt across a unified dashboard
- Integrated Stripe subscription billing with webhook-driven plan management, supporting free and Pro tiers with real-time plan upgrades

- Implemented multi-currency support across 150+ currencies with localised pricing (USD, AUD, GBP, LKR) and real-time transaction tracking
- Applied Row-Level Security (RLS) in Supabase to ensure complete data isolation across multi-tenant users
- Delivered smooth micro-animations using Framer Motion and built a fully responsive UI with a dedicated mobile bottom navigation

Stack: Next.js, TypeScript, Supabase, PostgreSQL, Stripe, Zustand, Framer Motion, Recharts, Tailwind CSS, Vercel

Frames — Full-Stack Streaming Platform watchframes.vercel.app

Mar 2026 – May 2026

- Built a production-ready streaming platform supporting movies and TV series discovery, browsing, and playback with a cinema-quality experience
- Implemented Clerk authentication with email and social OAuth, protected routes, and per-user cloud database backed by MongoDB
- Developed a full-screen embedded video player with autoplay, next-episode support, and zero-reload navigation using the Next.js App Router
- Built personal watchlists synced to MongoDB with optimistic UI updates and a dynamic hero banner with auto-rotating backdrops and YouTube trailers
- Integrated the TMDb API to power 1,000+ titles across movies and TV series with genre browsing, search, and season/episode playback

Stack: Next.js, TypeScript, MongoDB, Mongoose, Clerk, Zustand, Tailwind CSS, TMDb API, Vercel

Melbourne Open Playground — Full-Stack Web Platform

Jan 2026 – Present

Deakin University — Capstone Team Project

- Contributed as a backend developer to a team-built full-stack web platform using Next.js, TypeScript, and Supabase PostgreSQL
- Implemented secure login API endpoint with bcrypt credential validation, JWT token generation, and role-based data retrieval from custom user and roles tables
- Developed update and delete endpoints for the use cases API with input validation rules and built category fetching with search filtering capability
- Created a dataset statistics endpoint aggregating data across total use cases, categories, tags, and categorized versus uncategorized counts
- Conducted comprehensive testing — 22 Jest unit tests for category endpoints and 24 Jest unit tests for use case filtering, with extensive Postman manual testing
- Produced technical API documentation to support frontend integration and led the final project cleanup initiative for codebase maintainability

Stack: Next.js, TypeScript, Supabase, PostgreSQL, JWT, bcrypt, Jest, Postman

Zippy Delivery — Delivery Service Application

Sep 2023 – Nov 2023

Coventry University — Final Year Agile Coursework Project

- Contributed as a full-stack developer to a team-built delivery service application using agile methodology and Jira for sprint management
- Implemented frontend features using React and React Hooks, integrated REST APIs, and wrote unit tests using Jest to ensure code reliability

Stack: React.js, Node.js, Tailwind CSS, Jira, Git

SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, SQL, C#, C++

Frameworks & Libraries: Next.js, React.js, Node.js, Tailwind CSS, Framer Motion, GSAP, Recharts, Bootstrap

Databases & Backend: MongoDB, Supabase, PostgreSQL, Mongoose, REST APIs, Stripe, Clerk, bcrypt, JWT

State Management: Zustand, React Hooks, React Context

Testing: Jest, Postman

Tools & Platforms: Git, GitHub, Vercel, Figma, VS Code, Jira, Trello, Adobe Photoshop, Illustrator

Other: UI/UX design, graphic design, responsive design, performance optimisation, agile workflows

LANGUAGES

English Fluent

Sinhala Native
